

Visual Paradigm

Requirement · Design · Code

version 12.0

Release Date: December 15, 2014

Design Software System with UML

Sketch User Interface with Wireframe

Process Modeling Tools

In-Depth Use Case Analysis

Keep and Manage Project Keywords

Application Lifecycle Management

What Visual Paradigm Provides

UML & SysML

Design quality software with proven modeling languages like UML, SysML, SoaML, etc.

User Story

Describe high level user requirements.

User Story Scenario

Describe system interaction with user story scenario.

Wireframe

Illustrate user experience with quick and cost-effective wireframe tools. Associate wireframes with flow of events to demonstrate wireframe flow.

Requirements Management

Create, prioritize and manage system requirements in Requirement List.

Collaborative Modeling

Work as a team, enjoy collaborative and concurrent modeling experience with VPository.com.

What Visual Paradigm Provides

Code Engineering

Java and C++ round-trip engineering in seconds.

Glossary Management

Name	Type	Description
Broadcast	Resource	Schedule the schedule of TV programs.
Broadcaster	Activity	Activity that presents the recommended TV programs.
Broadcast	Resource	To broadcast the schedule of TV programs.
Broadcast	Activity	To broadcast the schedule of TV programs.
Broadcast	Requirement	Requirement from users about the TV programs.
Broadcast	Product	To play a TV program online.
Archived	Activity	TV program that was played 3 days ago.
TV Programs	Requirement	A segment of content intended for broadcast on television
Foreign users	Requirement	It is possible to ban specific foreign users from your state get unprecedented access to
Premium member	Requirement	Requirement from users about the TV programs.

Keep a list of project-related keywords. Define them, label them and add aliases if necessary.

Documentation Generation

Professional system specifications in MS Word, PDF and HTML format.

RACI & CRUD Chart

Simple, neat chart tools, best for the representation of responsibilities assignments.

Impact Analysis

Avoid unexpected consequences, inspect your model with matrix and analysis diagram before critical change.

Database Design

Draw ERD to visualize the physical structure of any relational database, regardless of its complexity.

UeXceler

UeXceler is a guideline for software development teams to identify real system requirements at the very beginning of development projects. UeXceler emphasizes the involvement and contribution of stakeholders. Throughout the requirement gathering process, stakeholders are encouraged to express their concerns and needs, which are then converted into use cases, user scenarios and requirements of the solution.
